Introducing Mr. Charles Baer to our many New Customers and answering the many inquiries about Mr. Baer from our Old Customers.

Mr. Baer today (December 2d, 1928), rounds out his 47th year of continuous service with us, a service but eight years less than our own. (This is our 54th year).

We believe Mr. Baer the most practical Horticulturist in America today. We consider his experience the most varied. We believe he is about the best known. We are reasonably sure he has done about as much with Horticulture today as any living person.

Unquestionably, Mr. Baer has been a great instrument in our success. Great credit is due him for his many achievements, his numerous improvements in plant life, his new creations, his adoption of the most worthy importations, his close contact with horticulture experiments, tests and investigations.

Think of this vast store of knowledge at your disposal; think of this half century experience behind every purchase; think of 47 years of education reflected in this institution; think of this lifetime of service "all yours."

We feel we are in every sense of the word Experts, Specialists, an Institution with experience and ability.

Mr. Baer came to us as a boy of fourteen years of age and in his long service has never had a single day's loss of time. We have a host of others who have been with us 15 years, 20 years, 25 years and several over 30 years, one 37 years. All men of experience, ability and knowledge; all experts in our line.

One thing more—in order to create individuality, to render genuine service, to create unsurpassed quality, each and every employee is on a profit-participating basis. Thus, all working as a unit of closest cooperation, every employee assumes a self-imposed task, the spirit of "One for all, all for one," striving to their utmost to serve you better with each passing year, recognizing that "your satisfaction is our success." Dahlias

With Each Dahlia Order We Will Send Explicit Instructions How to Grow Mammoth Dahlias

Childs' for over a half century have been and continue to be America's Leading Dahlia House. We list only the varieties that we consider generally useful for the average grower, although we grow many other varieties. During the past 53 years we have produced many new varieties, of which Sunkiss, the Two-in-One Dahlia, continues supreme, regardless of the many new ones since.

It has been known for many years that the salt atmosphere of Long Island instills a constitutional vigor into plant life that cannot be surpassed. In no other plant does the Latent Life assert itself as in Dahlias. In no other plant has Long Island grown vigor been more evident than in the Dahlias. From all sections testimonials reach us of the superiority of Childs' Dahlias. From all sections orders from a satisfied trade roll in.

The Great Sunkiss Dahlia

Dahlia Plants

We feel that many of our customers have the wrong idea about Dahlia Plants not being as satisfactory as Roots. Just why they should think so we cannot say, but to all who think so we wish to state that plants will do everything that roots will do, with the added advantage of producing more bloom, bigger bloom, longer stems, blooms several weeks earlier and just as late. Practically all large Exhibition or Show blooms are from plants. Plants make large tubers the same season as planted. All our prizes are won from blooms from plants. They are to be had at a much lower price.

Our Great Sunkiss Dahlia

THE GREAT TWO-IN-ONE DAHLIA—SEE THIS IN COLOR ON THE FRONT PAGE

6840. This magnificent Dahlia continues to be as much of a sensation today as it did the first time we exhibited it at the New York Show. At that time it captured the "twelve and twenty-five vases" class prize and was the talk of the show. It is unquestionably the most beautiful, most attractive, and most pleasing introduction of many years. It has received an "Award of Merit," the highest honor possible to receive.

It is a Giant in size. The color combination is conceded one of the most beautiful and most harmonious expressed in any flower. It is a Hybrid Cactus of glorious form, composed of broad petals which roll up, appearing like large quills which are a rosy-salmon, set on a full double center of lively canary-yellow.

6840 Tubers, each $1.50; plants, each 75c. Postpaid.

The Four Dahlias in Color on Inside Rear Cover

These four Dahlias, next to our Celebrated Sunkiss, we consider the Premier Dahlias; they are the real aristocrats of their class. For Exhibition purposes they are unequalled. All four reach enormous proportions. The Elite Glory and Siskiyou are almost Monstrosities they are so large, reaching 12 to 14 inches.

8750 (1) Ambassador. Somehow or other the beautiful color of this gorgeous Hybrid Cactus Dahlia just makes one stand in awe that anything could be so exquisite, so marvelous, so exceedingly beautiful. Nature almost vies with itself in the creation of this masterpiece. It reaches gigantic size, some measuring ten inches across. Is a splendid bloomer; one of the best for cutting. The color is an exquisite delicate yellow-buff with a suffusion of salmon-pink. Has the appearance of a large salmon-pink Dahlia with a smaller yellow one placed in the center. **Tubers, each $1.00; plants, each 50c.**

8548 (2) Rose Fallon. (Dec.) A sensation among Dahlias. One of the newest creations. One of the greatest ever introduced. Certainly one of the largest. The color a deep old-gold of the rarest shade. No Dahlia has more genuine substance or delightful formation. The color is almost beyond our ability to describe, mere words could never express its beauty, adjectives fall short emphasizing its delicate lustre. It just seems to be a masterpiece par excellence. The size is remarkable; ten inches across are common and never, no, never has any Decorative Dahlia seemed to have so much majesty, so much stateliness, so much exquisite poise as this beautiful Rose Fallon. **Tubers, each $2.50; plants, each $1.25.**

8797 (3) Siskiyou. A marvelous Hybrid Cactus. One of the newest and latest creations. Generally conceded the King of Exhibition Dahlias. Few if any reach its monstrous size. None exceed it in immensity. Just how to describe its colorings is difficult, even the color illustration on the rear cover fails to do it justice. It was simply impossible to bring out the exquisite color shades. It really has beautiful pinkish background overlaid with the daintiest tints of mauve. As for size—phew—it's a monster; we exhibited one 15 inches across. If you truly love Dahlias—try this Leviathan. **Tubers, each $3.00; plants, each $1.50.**

8453 (4) Elite Glory. (Dec.) Many Dahlia growers claim this to be the largest Dahlia grown; we ourselves exhibited three that measured 14 inches across. The color of this Glory is surely Elite enough for any one. It is the most striking, blazing, radiant, bright red Decorative Dahlia we have ever seen. So clear, so distinct is the color that no confusion of comparing it with other reds need exist. The color illustration is a poor reproduction compared with the real flower. There is a glow, a substance, a color that only an Artist could duplicate. The formations are ideal and exquisite. The stems long, large and strong. **Tubers, each $3.00; plants, each $1.50. Postpaid.**

8987 COLLECTION. One each of above four for $4.00. Postpaid.

New Dahlias

INTRODUCED THIS YEAR

We never make it a practice of offering New Dahlias or anything else unless they are of noticeable and outstanding merit. These new varieties are in our opinion unusually beautiful, extremely large, free flowering, marvelous colorings, great substance and perfect form.

8425 Bonanza. (Dec.) A well-named variety, surely is a bonanza among Dahlias. Especially is this true when you stop to think that there are hardly any clear deep crimson colors. This one is the most beautiful true crimson among the Dahlias. There is not the slightest trace of darkness in the color. It is very free flowering, averages 6 to 10 inches. Fine for cutting and holds up well in water. **Tubers, each $1.00. Plants, each 50c. Postpaid.**

8441 Dark Maroon. (Dec.) Very odd and extremely beautiful. Reaches immense proportions, frequently 12 to 14 inches. Very valuable cut flower variety on account of its long strong stems. The color is a deep velvety maroon, almost black, which on account of its beautiful formation makes it very striking. Flowers do not sunburn. Plants grow tall, vigorous and robust and remain filled with bloom throughout the season. **Tubers, each $1.50. Plants, each 75c. Postpaid.**

8443 Doris G. Graf. (Dec.) Here is a beauty mere words can hardly describe. Of all the many bronzes and autumn colors, none other is like or compares with this. Of a golden-bronze, it has the faintest touch of orchid. Frankly it is so beautiful words can't describe it. In the morning or after a rain the dew or water sparkles like gold leaf sprinkled all over the flower. Never has anything more beautiful or richer been offered. In fact there is nothing like it in the whole world of Dahlias. Nothing excels it in beauty. Flowers average 6 to 8 inches across. Strong stems. Good shipper. Excellent for cut flowers. **Tubers, each $1.50. Plants, each 75c. Postpaid.**

8827 Ella A. Klein. (P. F.) This new introduction is a monstrous beauty of great proportions. It is one of the most perfect formations of the Peony-flowered. The color is of the clearest light yellows. A color that must be seen to fully appreciate its sheen and clarity. Its habit of blooming continuously and profusely places it in a class much its own. Blooms reach 10 inches across. The stems are long and unusually strong. Will be valued for shipping, for which purpose it can't be excelled. **Tubers, each $2.00. Plants, each $1.00. Postpaid.**

8771 El Jebel. (H. C.) One of the most dazzling, fascinating colors we know of. It is scarlet and gold with amber to yellow shadings. Very difficult to describe its beauty. As we never introduce anything that does not seem to us better than anything near it—you can rest assured it's an extraordinary beauty. It is extremely large, very bold in its display. Very fetching in the garden. Equally as beautiful for cut flowers. Very vigorous grower. Extremely free bloomer. **Plants, each $1.00. Postpaid.**

8774 El Granada. (H. C.) Here's a Gold Medal Winner and a constant prize winner everywhere. You of our customers who desire to add strength to your flower show exhibits should secure this one. In the first place it reaches extremely large proportions, frequently from 12 to 14 inches across. In the second place it is just about the most exquisite color you ever saw in your whole life. It is a vivid orange with a creamy yellow reverse, you might say it is a genuine poppy-orange of dazzling effect. Being a Hybrid-Cactus you can almost imagine its marvelous beauty. **Plants, each $3.00. Postpaid.**

8700 Kaleidoscope. (Hybrid Dec.) An oddity of unusual and unique beauty. While we have fixed the

Ella A. Klein

colors, it has been impossible to prevent its kaleidoscope arrangement of those colors. It is a cerise on white. Some run white centers, some cerise centers, others half white, half cerise, others nearly all cerise, others nearly all white, still others all cerise on white, others striking arrangements of both colors. The stems are good and strong. Very free bloomer. Average 8 inches across. Fine for cutting and shipping. A most fascinating sight to see one bush with its kaleidoscope arrangements of beautiful striking colors. **Tubers, each $2.00. Plants, each $1.00. Postpaid.**

8786 Mrs. Eleanor Martin. (H. C.) Here's another whirlwind of the prize-winning class. Blooms average 10 to 11 inches across on giant strong 2-foot stems well in keeping with the immense size of the flower. It is no exaggeration when we say it is gigantic in size. The color is an exquisite mulberry suffused with gold. Almost a rich wine color in which the gold suffusion gives it a swimming dewy appearance. Really this is an extraordinary dahlia. **Plants, each $2.00. Postpaid.**

8704 Nippy Gardener. (Hybrid Show.) We consider this one of the finest and most beautiful of the whites we have ever introduced. Average 6 to 8 inches on long strong stems. It is a white overlaid with a very delicate tint of lavender. Splendid for cutting. Keeps well, hence is highly desirable for market purposes. **Plants, each $2.00. Postpaid.**

8875 Pink Goddess. (P. F.) We do not think any over-burst of enthusiasm was used in naming this huge Dahlia "Goddess," for in our opinion it stands out in a predominating "Goddess of Liberty" manner with its striking rich rosy-pink so marvelously shading lighter to the center. It is truly an addition to the Peony-flowered that has long been needed. Grows very large on fine cane-like stems. **Tubers, each $1.00. Plants, each 50c. Postpaid.**

8650 World's Best White. (Dec.) We believe we are well within our rights when we say it exceeds anything in a white that has yet come to our notice. Bear in mind also that nowadays we are all striving for size and that only the flowers like this, of immense size, have little if any chance of getting in any Dahlia catalog nowadays. **Plants, each $1.00. Postpaid.**

8999 Collection one plant each of above 11 for $12.00. Postpaid.

Last Year's Novelty

FLORAL PARK DAHLIA

(Decorative)

8456 Last year we introduced this regal beauty for the first time. At the Nassau Exhibition it was the center of attraction and conceded a Dahlia extraordinary. The color is a rich, beautiful, fascinating yellow (practically a canary-yellow), striped and blotched with orange-red. It is of good dimensions, 6 to 8 inches.

One of the best for cutting, and lasting qualities. The blooms we send to the New York market are grabbed up quickly. As we say elsewhere we have many new types each year but never offer any for sale that is not strikingly different or of unusual merit. We unhesitatingly offer this gorgeous Dahlia, firm in the belief that it fills a place decidedly its own; that it is a much needed acquisition to the Dahlia Kingdom.

It is a vigorous grower, fills out tubers of large size, stands erect on good long, strong stems.

Advance orders taken at Dahlia Shows, where shown, have indicated its admiration, appreciation and popularity. **Tubers each $1.00; plants each 50c. Postpaid.**

Our Own Original Introduction Storm King Fuchsia Much Improved

15920 Improved Storm King. This is a Childs' introduction. Unquestionably the most popular flowering plant we catalog. It is rich in the greenness of its foliage. The graceful pendant-shaped flowers of unique, fascinating, but beautiful form, in its beautiful coloring, make it a plant that is much admired.

A double white, perpetual blooming weeping Fuchsia. Its graceful, weeping habit, and beautiful flowers are more freely borne than those of any other sort, making the most valuable of Fuchsias. It is always in bloom. The branches droop most gracefully and the blossoms are very large.

The buds, for two weeks before they expand, are balls of glowing scarlet-crimson. When expanded the enormous double flowers are almost pure white, capped by a calyx of glowing scarlet. (See illustration.)

It is something radically distinct, something supremely better. The rich blue colors excel any other Delphinium.

It is a generally accepted idea that Delphiniums in formation are alike —not so with this strain—they are different shape, carried differently on the spike, colors and centers are different from any other Delphinium.

Plants are strong and vigorous. Produce long, strong spikes up to 5 feet tall. Bloom in profusion all season.

It starts up again each spring thereafter and blooms within a few weeks. This is one of the finest real good things we have to offer. It will please and satisfy you. The second year flowers are large in huge clusters with colors that are exceedingly beautiful and varied, ranging from pure white to rich red. Many of the flowers are ringed and spotted, creating a most novel and fascinating effect.

I myself also find words inadequate to tell its virtues so beautiful and wonderful have been my plants and flowers. Never again would I go back to the old-fashioned Sweet William, now that I know I can have them blooming all summer.—Mrs. Grace Boswell, Napierville, Illinois.

PLANTS TO FAR AWAY HAWAII

To my complete surprise the box of plants arrived in a very wonderful condition. There is no doubt in my mind every plant will grow. Your Storm King Fuchsias purchased last year are much admired by all my friends.—Mrs. William Keller, Hilo, Hawaii.

Calendulas of Monster Size

Childs' Mammoth Orange. We offer you in this strain a monster sized Calendula that is so profuse a bloomer that it fairly blooms its life away. Keeps the garden ablaze with color. Keeps the house full of the finest cut flowers. Keeps the neighbors' homes full, also. Comes early in the spring, the last to defy Jack Frost.

The flowers frequently measure three inches across. Are of fine and very double formation. The color is of the richest orange, glaringly bright. Keeps for long periods when cut and for weeks on the plant. The more you cut the flowers off the better it blooms.

Thanks for a Cosmos that will bloom before freeze-up. Your Giant Extra Early does the trick.—Mrs. Carl Schmidt, Souris, Manitoba.

My husband said he would have to see a Sweet William that would bloom the first year from seed and bloom all summer. Your Everblooming turned the trick. Enclosed find 75c. for another ¼ oz.—Mrs. Mark Inskip, Evanston, Ill.

Giant Extra Early Cosmos The Largest and Earliest

Very few flowers equal this in exquisite shades and form of bloom. If you want a mass of bloom from early July to freeze-up, try this superb strain. The flowers are of gigantic size. The bushes unusually high, full and spreading. Literally loaded with flowers of most exquisite shades of white, pink and crimson. Most other Cosmos bloom so late that we know if you try this strain you will never grow anything else but the true Childs strain. (See page 65.) Lasts very long when cut for vases.

51854 Giant Double. Pkt. 25c ¼ oz. $1.00

American Lodenz Boxwood Privet

We are not illustrating this because of space and because we feel everyone knows what boxwood is. This is quite generally sold as true boxwood so closely does it resemble it in appearance and habit. It is known botanically as Lodenz Privet of a bushy dwarf-growing habit (12 to 20 inches). Develops, matures and grows fully four or five years more rapidly than true boxwood. Costs about one-twentieth of the true boxwood and we believe answers the purpose better and it never freezes out.

A Rare Combination of Beauty

This is the House or Pot Plant so widely discussed and written about this past year in all the garden and home magazines, the trade and daily newspapers. As usual with novelties of this kind, Childs offer it. In offering this this year we have, we believe, one of the most fascinating, unique and beautiful house plants possible to obtain anywhere.

Unlike other house plants, it is one of the very few that is always in bloom and with fruit. The blossoms are more white than pink, as shown in the illustration. The fruit in appearance are almost the size, color and appearance of Red Currants; thus they are unusually attractive and striking. The flowers are first to appear, later giving way to the fruit; hence the bush becomes literally covered with bloom and fruit at the same time and continues so the year round.

It is possible through some atmospheric or soil condition it may have short lapses of blooming periods.

Unlike most novelties offered for the first time, we have generous stocks and have priced it very low, so that all of our customers can have a number of them.

16855 Each 35c; 3 for $1.00. Postpaid.

Childs' Concord Grape

See Illustration Opposite

It is an exceedingly difficult thing to improve something that is already just about the height of perfection, as is this old reliable. However, we have for a number of years been carefully selecting and roguing this good old reliable variety, by propagating only from the vines that produce the largest, most perfect, most uniform and best flavored grapes. The illustration is a bunch picked at random from some of the vines and accurately depicts the size and formation.

It has the same rich deep purple color, but the grapes on each bunch have more uniformity in size, having few and in most cases no small ones at the end as is usually the case in ordinary vines. The flavor also appears to be richer, more highly flavored.

We also notice the vines are more vigorous, more rapid in growth and more heavily fruited, than all the older vines we have offered in years previous.

12130 Each 40c; doz. $4.00; 25 for $8.00; 100 for $25.00. Postpaid.

Tree Strawberry

See Color Illustration on Opposite Page

A Rare Variety for Canning

This is one of the most unique and at the same time the largest and most beautiful berry of any kind that has yet appeared before the public. It came to us from Japan, and is of the Raspberry family, though in many respects it resembles a Strawberry, growing on a bush two feet high. The plant is entirely hardy in any location, and a most prolific yielder, ripening an enormous crop of fruit in July and August, and more or less all the time up to November. In quality the fruit, though not so finely flavored as either the Strawberry or Raspberry, excels the Blackberry. It is very fine when cooked and makes a jelly which has a superior flavor to that of any other fruit. In habit of growth the plant is distinct from both the fruits named. The canes or shoots die to the earth in winter, new ones being thrown up the following spring, which begin blooming and setting fruit at once. The foliage is light green in color, bright, clean, cheerful and pleasing, and exempt from attacks of all insects and diseases. The berries are globular, slightly oblong in form, monstrous in size, a rich, glossy, ruby-red color, sweet and melting and of such transparent beauty as to cause everyone to view with amazement upon first seeing a plant in bearing. The blossoms, too, should not be overlooked. They resemble in appearance single roses (the petals being cupped), snow white in color and are fragrant.

12115 Each 25c; 5 for $1.00; doz. $2.00. Postpaid.

Our New Sweet Scented Double Syringa

(See illustration below.) Here's a real thrill in a shrub. It will give you more satisfaction than any other ten shrubs you can grow. It's our own introduction. So far as we know we alone offer it. A full-grown bush will scent the surroundings for a block away. A branch in a vase will make your house as fragrant as a breath from heaven. Imagine if you can a bush with flowers literally covering the branches fully two feet (see illustration.) The flowers resemble small white roses or gardenias—except they are all of true double formation.

Perfectly hardy anywhere. Once well rooted it grows extremely fast.

New Bush Verbena

Blooms in Great Profusion

See Color Illustration on Opposite Page

First offered by us in 1925. One of the finest, most beautiful, most useful flowers we ever brought out. Fills a long felt need in the garden. It produces flowers in great profusion. This wonderful new Hybrid grows about 18 inches tall, and has an auricula-eyed flower, borne on long stems, suitable for cutting. Also pot and window box culture. Heretofore its spreading or crawling habit has hindered its more universal use. This new type will extend its usefulness. It produces in the same abundance as the common varieties.

In fact, it is one of the few flowers of everlasting habit.

Plants become heavy laden, and are covered with a heavy leafy background. A real enjoyable plant to grow.

Azalea Superba

Azalea Amoena Superba

Did you ever drive along New York villages and see bushes literally covered with rose shaped flowers, so thick in fact, you couldn't see the leaves on the bushes? Well, this is that wonderfully prolific shrub. They start to bloom their heads off the first year and each year as they increase in size the profusion of blooms increases. Always when in bloom it is a fascinating, dazzling display of color and flowers. It is of intense deep rich crimson. Although perfectly hardy, we suggest you protect the first couple of winters by covering with leaves or stable manure.

It is beyond a doubt one of the finest palms possible to grow. Nothing can surpass it as a decorative plant. It will succeed in any window. If moved outdoors in summer does equally well. The foliage is graceful, striking and beautiful. We offer it because we have been studying the best palms for growing in the home and find that this, Kentia Belmoreana and our Filifera are unquestionably the best for average home conditions.

In all respects it resembles the well-known green leaved Barberry, so popular for years, except that the leaves are red. The leaves are a rich, lustrous, wholesome, healthy bronzy-red. Childs' New Paradise Melon

1,000 Melons From One Plant. Same Flavor as the Honey Dew

1195 We introduced for the first time last year the greatest muskmelon of all time. Never has such a wonderful melon for productiveness and flavor combined been known. One of the earliest of melons, matures in about 70 days. Has a smooth skin and striped like a watermelon. Inside when ripe is a very pale green. The flavor is almost identical to the world-renowned honey-sweet Honey Dew melon. Average, pound and half in size. Vines run from 5 to 6 feet in length. Just the home garden ideal. Under oath before a notary, J. M. Couse, a prominent business man, states he counted four average vines bearing melons as follows: 381, 196, 254, and 243. Market Gardeners should try small areas. A great melon for Southerners to plant in October for Christmas markets. The premier melon for early Summer melons.

Pkt. 35c; oz. $9.50. Postpaid.

Childs' Golden 60-Day Extra Early Sweet Corn

2 Weeks Earlier than Golden Bantam. Larger Ear than Golden Bantam. Just as Sweet as Golden Bantam.

765 Although we have doubled our crop each season since we first offered this three years ago, we have sold out entirely each spring. We suggest to those who use large quantities either buying or reserving their requirements early.

Gardeners especially have made great cash clean-ups in growing this variety because of the higher prices obtained before Golden Bantam and other early varieties are ready for the market. We have several gardeners who order as high as 800 lbs.

Next to our white variety Makegood, this is the earliest variety we know of in the United States. It is two weeks earlier than Golden Bantam, a larger ear and equally sweet.

The larger ear makes it a better seller than Bantam. It has 12 to 14 rows to the cob. The kernels are plump, full and luscious.

For home use it should be planted at the same time as Golden Bantam and Stowells, which will give you corn for the table throughout the season.

So many of our customers prefer Golden Bantam to all others. It isn't our wish to sell Golden 60-Day in preference to Bantam. (We handle both varieties.) We do, however, want you to stretch your Sweet Corn season out. This variety can be sown in weekly succession up to any date that still leaves 60 days' ripening period.

Pkt. 15c; ½ lb. 30c; 1 lb. 50c; 2 lbs. 95c. Postpaid. 5 lbs. $2.00; 10 lbs. $3.50; 25 lbs. $7.50. Not postpaid.

Overnite Radish — Earliest Producer Tomato — Six Weeks Pea

Childs' Earliest Producer Tomato

1975 (See illustration above.) Of all the vegetables grown, tomatoes seem to be the one that carries most interest in the ripening period. Somehow or other we all watch and wait for early tomatoes. Here is an extra early tomato that will require less waiting than any. It matures in 95 days. Especially in the northern districts it is valuable, as it is a vigorous growing, quick maturing type.

The fruits are of fine size, brilliant scarlet color. Ripens uniformly. Nearly round. Entirely smooth. Flesh solid. Finest flavor. Very productive. Tough skin. Good keeper. Fine shipper. None better for slicing, catsup, pickling or cooking. **Pkt. 15c; ½ oz. 40c; 1 oz. 75c; ¼ lb. $2.00; 1 lb. $6.00. Postpaid.**

The inside of Childs' Supreme Muskmelon

Childs' Supreme Muskmelon—

1230 (See illustration.) A truly magnificent and distinct melon. The largest in size and the finest in quality. It is the shape and color of Emerald Gem, but does not have its objectionable softness when ripe. Childs' Supreme grows from 15 to 18 lbs. and more. Color, deep emerald-green outside, with more or less netting, while the flesh is a fine deep salmon and of unusual thickness. Its quality is like that of Emerald Gem when at its best. The richest and most delicious flavor, tender and melting with absolutely no hard substance. People who find that melons disagree with them can eat this one as there is no solid indigestible substance about it. A strong, vigorous, healthy grower, succeeding under conditions that bring failure to many other varieties. Fruit of this melon readily sells in all markets on account of its mammoth size and fine appearance.

1230 Pkt. 15c; oz. 35c; ¼ lb. $1.00; 1 lb. $3.00. Postpaid.

Childs' Overnite or Leafless Radish

1675 Childs' Leafless or Overnite. (See illustration on opposite page.) Since we introduced the Leafless Radish a few years ago, it seems to have taken the country like wild fire. It almost seems "Overnite," for "12 days from seed to an edible, delicious, tender, sweet, crisp radish on the table" is surely a short time.

Unquestionably one of the earliest radishes grown. It is practically leafless, having usually only two small leaves, hence its earliness. No growing to tops with this great meritorious novelty. Although bred for extreme earliness, it is conceded equally as tender as the tenderest radish grown. It is very globular in shape. Flesh pure glistening white, extremely mild. Unusually crisp, cool, tender and sweet. Delightful flavor, strikingly handsome on the table. The tops are short, average one-half to an inch in diameter. Devoid of pithy, woody substance. Keeps its tenderness and freshness for a prolonged period. **Pkt. 15c; oz. 25c; ¼ lb. 65c; 1 lb. $1.75. Postpaid.**

Your leafless radish is very fine. Shows up nice when bunched for market.—Sutherland Bros. (Market Growers), Morrisonville, N. Y.

Your Overnite Radish is a wonder, such small leaves and fine bulbs. —C. R. Carroll (Market Grower), Amherst, Mass.

Childs' Pineapple Onion

1371 (See illustration opposite.) Here's an onion of unusual merit, unusual shape and unusual flavor. Here's an onion that leaves no repulsive onion "after-effects." An onion that is decidedly distinct in every way from any other onion. Shaped like a bottle and slightly flavored like a Pineapple.

It is an ideal onion for the home kitchen and general table use. It is just as easy to grow as any onion and certainly more desirable. It has a superb flavor that cannot be equaled by any other onion. It has a delicate flavor, a delicious flavor beyond compare. It is rich, tender and crisp. For mildness it surpasses by far the sweet Spanish onion. **Pkt. 15c; oz. 85c; ¼lb. $2.50; 1 lb. $7.50.**

Childs' Extra Early Six Weeks Pea

1500 (See illustration on opposite page.) Our Great Pea Specialty. All that its name implies. Ready for use six weeks from planting. It is by far the earliest pea in cultivation; although a select strain carefully developed for years for extreme earliness, it is also as sweet and luscious as the finest pea known. Whether used for home or market it is the premier pea. The vines are dwarf, about 16 inches in height. It is very vigorous and hardy. A wrinkled variety of the American Wonder type. Childs' Vegetable Specialties and Novelties

Childs' Earliest Cucumber

(The Earliest of All)

825 (See illustration above.) Cucumbers differ from most other vegetables in that they are, as a rule, always served raw. Therefore a really worth-while variety must of necessity be tender and crisp. Next comes earliness. In Childs' Earliest we have an extremely early variety, tender, crisp, cool and finest flavor. It is a variety of vigorous growth that fruits early, maturing in about fifty days. It produces in abundance a fine shaped fruit about seven inches in length. It is uniform in size, very straight with a slight indication of pointedness, dark green in color and clear white flesh that is unusually tender, crisp and finely flavored.

It is one of the best for slicing, salads and pickles. It retains its color for prolonged periods after ripening, an especially valuable attribute. Its habit of fruiting early permits of early picking and prolongs its period of usefulness. **Pkt. 15c; oz. 25c; ¼ lb. 60c; 1 lb. $1.75. Postpaid.**

Byers' Stringless Greenpodded Bean

180 (See illustration opposite.) This stands unchallenged as the most meritorious of all the Greenpodded Bush Beans. It is the acknowledged premier Snap-bean. It outranks any other Greenpodded Bean. It is stringless, luscious and exceedingly tender. Big yielder. Its season is longer.

Plants of healthy, vigorous growth, very branching and productive. The pods are five to six inches long, round, nearly straight, green in color, very brittle and fine quality. The plants are very productive and have a long season of bearing. It is a valuable sort for the home garden or market. The Byers' is more than twice as productive as most of the other varieties.

Pkt. 15c; 1 lb. 50c; 2 lbs. 95c; 5 lbs. $2.25. Postpaid. 10 lbs. or more 35c per lb. Not Postpaid.

Childs' Extra Early Coreless Carrot

585 (See illustration below.) A carrot that can be eaten raw with almost as much relish as an apple, is what we can righteously claim of this wonderful strain. Although it is an extra early variety it can, on account of its coreless nature, be used long, long before maturity with the added advantage of having a tender, delicious coreless carrot the following early spring months, by winter storing.

It is the sweetest and best flavored carrot we know of. It has the finest grain and texture of any strain. The flesh is much firmer than any other sort. It does not discolor like other varieties. Its color is richer and more appetizing than any of its family. It is the best for forcing. The best for early market trade. The best for the home garden for early use. Matures fully two weeks earlier than the next earliest carrot. Measures six to seven inches in length. Blunt at both ends. It is the ideal shape for carrot. Skin is smooth. Small tops. Short tap roots. The orange-red color is deeper than is any other sort. If you want something delicious start gathering these carrots when very young and keep on using them regardless of size. **Pkt. 15c; oz. 25c; ¼ lb. 75c; 1 lb. $2.00. Postpaid.**

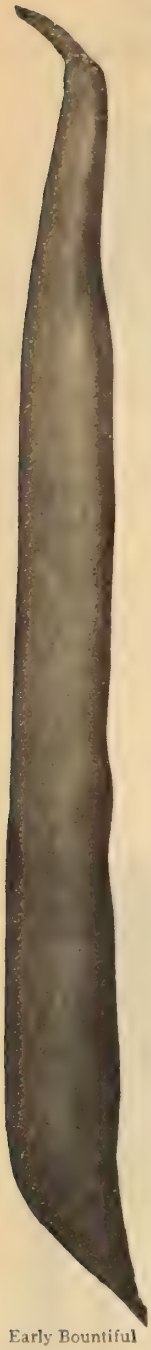
BEANS—Bush Varieties



Early Bountiful

What is more delicious than fresh, brittle, stringless beans right from your own garden? Beans are among the comparatively few vegetables that will yield well in even poor soil, although, of course, greatest crops are gathered in moderately rich loam. They should not be planted until the soil is quite warm and all danger of night frosts is past. Never walk between the rows or attempt to cultivate them nor to gather the crop while the vines are wet. It will spread rust, and the leaf spot disease. Drop seeds 4 inches apart in the row and cover with from 2 to 3 inches of soil, leaving 2½ feet of space between the rows. One pound of seed will sow about 100 feet of row. For a constant supply for a family of five, sow 30 feet of row every other week from May 1st until July 1st. Prices are postpaid except where noted otherwise.

Beans—Pole Varieties

Old Homestead or Kentucky Wonder

Pole Beans are much heavier yielders than bush varieties. When properly staked up for vines to run up they require less room than the bush varieties. Hence, are largely used for small gardens, where the space is limited. Many claim the quality better.

Culture. Do not plant Pole Beans until the ground is warm, and the weather settled, after all danger of frost is past—about May 1st. Set poles about 4 feet apart each way and put 6 beans around each pole. We are offering here the very best varieties of Pole Beans. One pound will plant 200 hills.

Green Podded Pole Beans

230 Kentucky Wonder or Old Homestead. (See illustration.) There is not a more dependable bean in existence, nor another bean that equals it year in and year out for sure large yields of unequalled quality. It isn't only a Kentucky Wonder, it's a National Wonder.

In quality it is par-excellence and is luscious, tender, brittle and stringless. We have in our own strain of this an Improved Type that is remarkable for its extra earliness, maturing in about 60 days. LIMA BEAN—Bush Varieties

Improved Bush Lima

Lima Beans should not be planted before the soil has warmed up and the weather quite settled. Place the eye down, about 5 inches apart in rows 2½ feet apart and cover with 1 inch of soil. One pound of the seed will sow a row 100 feet long; ¾ bushel will plant 1 acre.

300 Fordhook Bush Lima. (See illustration.) Many years of study and experiments have enabled us to markedly improve this wonderful variety.

There can be no conflicting of opinions as regards which is the best variety, as it is universally agreed this is the best. It has so many virtues any one of which would in itself be a prime attribute for commendation, viz.: It has an ever-bearing habit of growth that permits it to bear all season. It is extremely early. It bears until late frost. The pods are immense in size. It is exceptionally prolific. Is of finest flavor. Is big, fat and juicy. Vines frequently bear half a hundred pods at one time. The pods are long, wide and thick. Plants are 2½ feet across. Usually bears in clusters of 4 to 8 pods. It is the most popular of the Limas. The best for the commercial grower. LIMA BEAN—Pole Varieties

330 Giant Podded Pole Lima. This is really a remarkable Lima from its point of productiveness. The vigorous growing vines grow with extraordinary rapidity to 10 or 12 feet in height, throwing out in its various stages of growth 10 to 15 laterals, each producing immense quantities of pods. The first roots produce a crop and then on in succession, as the new branches form, comes additional pods, thus giving succession crop on the same parent stem—or in other words it is an "Everbearing" variety.

Pods come in clusters of 4 to 8, measuring 7 to 8 inches long, 1½ to 2 inches wide and thicker than any other Pole Lima. The flavor is delicious. It is tender, meaty, luscious and sweet. Matures in about 80 days. **Pkt. 10c; ½ lb. 25c; 1 lb. 40c; 2 lbs. 75c. Postpaid.** By express at purchaser's expense, **10 lbs. or more, 30c. per lb.**

Fordhook, the quality standard among Bush Limas.

BEET

While Beets may readily be grown in any kind of soil, they prefer a deep, rich loam, free from stones.

Seeds are sown as early in the spring as the ground can be properly prepared. Walking over the row after seeds are sown will press the soil in firm contact with the seeds and produce quicker germination.

Sow in rows 18 to 24 inches apart, and should be covered with about ¼ inch of soil. When about 4 inches tall, thin out to about 4 inches apart in the row. Sow a 15-foot row every week from early in April until middle of July. One ounce is sufficient to sow about 60 feet of running row.

400 Rajah. King of Winter Beets. (See page 51 for color illustration and page 50 for additional description.) Color is a very dark blood red, and its tenderness and quality wonderful. **Pkt. 15c; oz. 25c; ¼ lb. 65c; 1 lb. $1.95. Postpaid.**

360 Childs' Early Wonder. (See illustration.) It is an extremely early beet, hence a desirable and profitable one for both home and market. It is the best for succession growing where young, tender beets are wanted throughout the summer. It is of globe shape, coming probably more uniform in size and shape than any other beet grown. The skin is smooth and the flesh a deep blood red, singularly free from white zones. In fact, in growing our seed every beet is notched for zone appearance and all white livered specimens discarded. It is an extremely tender and fine flavored beet. It retains its flavor during cooking better than other beets. It is unusually attractive sliced. It enhances the appearance of salads. Matures in 45 days. **Pkt. 10c; oz. 20c; ¼ lb. 50c; lb. $1.50. Postpaid.**

Swiss Chard, a great yielder of Spinach greens all summer

Chard (SWISS CHARD OR SPINACH BEET)

A Beet which forms no roots, but makes big tops. The mid-ribs of leaves may be boiled and served like Asparagus, while the green portion of each leaf makes delicious Spinach greens. A 15-foot row yields about all a family of five can use between July 1st and frost.

441 Lucullus. (See illustration.) This variety is so vastly superior to any of the other types that we have discontinued all but this. Every garden should have chard of this variety. Similar to Spinach in flavor, and many think it superior as a delicacy. Prepare for use similar to Spinach. The white stalks or mid-ribs are also cooked like Asparagus. The leaves of this strain are heavily crumpled, tender, delicious flavor. Can be cut through and seasoned. Grows 2 to 2½ feet high. Does well in hot weather. It yields a constant crop from June to winter. Can be cut down to the ground; new shoots will then start again from the roots. Cabbage

Set aside one corner of the garden this year for slaws, salads, pickles, sauerkraut, etc. Golden Acre, Jersey Wakefield, Surehead and Ballhead, sown at the same time, will give a succession crop throughout the summer. Sow indoors or in a hot bed during February, transplant as weather permits. Six ounces sow one acre, one ounce produces 3,500 plants.

For Early Cauliflower, sow indoors or in hot beds during January or February, transplanting 2 to 3 inches apart, when plants will permit, then transplant 2½ feet each way in the open as soon as soil and weather will permit. Water freely, especially when heading. When heads form and are hard, tie the leaves over the head in order to blanch the head. Why not try a few heads of Cauliflower this year?

565 Childs' 60-Day Cauliflower. A fine hard heading cauliflower that ripens in 60 days. Flesh white. Not recommended for market purposes without a tryout. **Pkt. 50c; ⅛ oz. $3.00. Postpaid.**

575 Childs' Extra Early Surecrop. (See illustration.) An extremely dwarf growing cauliflower. The heads are snow white. Not so large as snow ball. Mature in 95 days. Is certain to head under almost any average condition. The leaves cling closely to the head and hence do not require early tying up. It is a reliable, dependable header. It is solid, tender, finely flavored. One of the best for cool regions, where it does particularly well. None better for warm sections. 655 Golden Plume or Wonderful. (See illustration.) A new type of Golden Self Blanching with wider leaves and thicker stems offered last year for the first time. A great improvement over all other yellow varieties. It is somewhat earlier than Dwarf Golden Self Blanching and is more easily blanched to a beautiful, clear, creamy white. The plant is stout and stocky and a full heart. A vigorous grower, resistant to disease, unequaled for home garden, local market and long distance shipments. **Pkt. 20c; ½ oz. 85c; oz. $1.65; ¼ lb. $5.00.**

We consider your Golden Plume Celery a vast improvement over any celery we ever grew.—Chas. Hotchkiss, Bel Air, Md.

Carrot

Chantenay Carrot

See Page 24 for our Coreless Carrot

Carrots play a large part in our diet, served both raw and cooked. Carrots are good for the complexion. Young children are given carrots among the first vegetables they are allowed to eat. Serve plentiful and often.

To have carrots throughout the season, make repeated plantings. Put the rows 24 inches apart and as soon as the seedlings are 3 or 4 inches tall, they should be thinned out to stand 3 inches apart in the row.

585 Childs' Extra Early Coreless. (See page 24 for illustration and full description.) The greatest carrot in the world. The earliest carrot of all. It is utterly devoid of core. Rich orange color. Blunt at both ends. **Pkt. 15c; oz. 25c; ¼ lb. 75c; 1 lb. $2.00. Postpaid.**

You can't go wrong with it. **Pkt. 10c; oz. 15c; ¼ lb. 45c; 1 lb. $1.20. Postpaid.**

630 Improved Long Orange. This is the long carrot that grows rather rapidly, gradually tapering in shape, but is free from small rootlets. It is a good keeper and excellent for winter use. Very handsome, straight, smooth roots of bright orange color, frequently 12 inches long and 3 inches in diameter at the neck. No better carrot for all-round table use or field culture. Very productive. Fine flavored. Tender and sweet, good from end to end. **Pkt. 10c; oz. 15c; ¼ lb. 30c; 1 lb. 95c.**

600 Danver's Half Long. It is generally pretty well conceded that this is the most popular of all carrots. It is a large cropper. A dependable cropper and matures in about 80 days. It is a small, handsome orange-red carrot, and for main crop has no equal. It is excellent in shape, growing from 6 to 8 inches long, averaging 2½ inches in diameter. It is a cylinder shape, tapering to a blunt end. **Pkt. 10c; oz. 15c; ¼ lb. 30c; 1 lb. 90c.**

On account of its thickness it frequently reaches 2 lbs. in weight and consequently is much used by farmers for stock feeding purposes. It is a deep orange in color. Very tender and sweet. **Pkt. 10c; oz. 15c; ¼ lb. 30c; 1 lb. 95c.**

Stock Carrots

These are the carrots that are good keepers, and grow to rather a large size and are excellent for winter feeding for stock. They are heavy yielders and seed should be sown in May and June. If sown in drills, 4 lbs. of seed will be sufficient for an acre. Increases the flow of milk in cows. For cattle, hogs, etc., they are unexcelled.

640 Improved Short White. This is the standard of this type of carrot and is very popular. Roots grow about 8 to 10 inches long, measuring 3 inches across, tops gradually tapering. It is a good keeper and has excellent food value. Much the easiest to harvest. **Pkt. 10c; oz. 15c; ¼ lb. 25c; 1 lb. 65c. Postpaid.**

Cress, or Pepper Grass

710 Extra Curled Upland. Thrives best very early in the spring and should be cut as rapidly as it becomes 4 to 5 inches tall, since it quickly goes to seed. Repeated plantings of short rows should be made often between early April and May 1st. **Pkt. 10c; oz. 15c; ¼ lb. 25c; 1 lb. 75c. Postpaid.**

It is most appetizing. Highly ornamental for the flower garden. Hardy and robust. **701 Pkt. 10c; ½ oz. 40c; oz. 75c.**

Chicory

Unexcelled for Greens or Salads

Witloof Chicory is grown for its roots, which produce an appetizing pinkish salad. One ounce of seeds will produce about 300 roots. Sow in May in rows 2½ feet apart and cover with ¼ inch of soil, 4 inches apart in the row.

700 Witloof or French Endive. In October when the roots are fully developed, they should be dug and the leaves cut off to within 1½ inches of the crown. The ends of the roots should be cut so that you have roots averaging 8 inches long. After keeping them out of the ground for about 2 weeks, replant in cold frames or boxes, covering the crown of the roots with 6 inches of light soil or strawy manure. Some advise deeper planting, but that will exhaust the strength of the roots much sooner. Cutting from roots thus replanted may begin in 4 weeks. **Pkt. 10c; ½ oz. 15c; oz. 20c; ¼ lb. 50c; 1 lb. $1.45. Postpaid.**

My gardener says 60-Day Sweet Corn July 4th.—Mrs. Chas. V. Edmonds, Clarinda, Iowa.

We motored to Detroit and were surprised to find that they had Sweet Corn, while ours at home was two weeks from ripening. My daughter said it was your famous 60-Day Makegood. Kale

It's well to bear in mind that every class of vegetables has a use distinctly its own, so it is with Kale. Kale furnishes excellent greens for winter and early spring use, with a flavor entirely different than any other vegetable. Frost and cold weather improves it. Sow during May and June in rows, 18 inches apart, and cultivate the same as cabbage. For spring use sow during September and cover with litter or straw. It is hardier than cabbage. If the winters are not severe, tender greens can be secured from under the winter covering.

Later on remove every other one, still later on remove every other one until 16 inches apart in the row. Cultivate thoroughly and often. For the earliest crop sow Black Seeded Simpson. The Butterhead varieties may be planted up to the middle of May, after which seeds should be sown of Iceberg or New York. Toward the end of May, plant Cos Lettuce only. Late August again brings favorable growing conditions for Matchless and other head lettuce and early kinds.

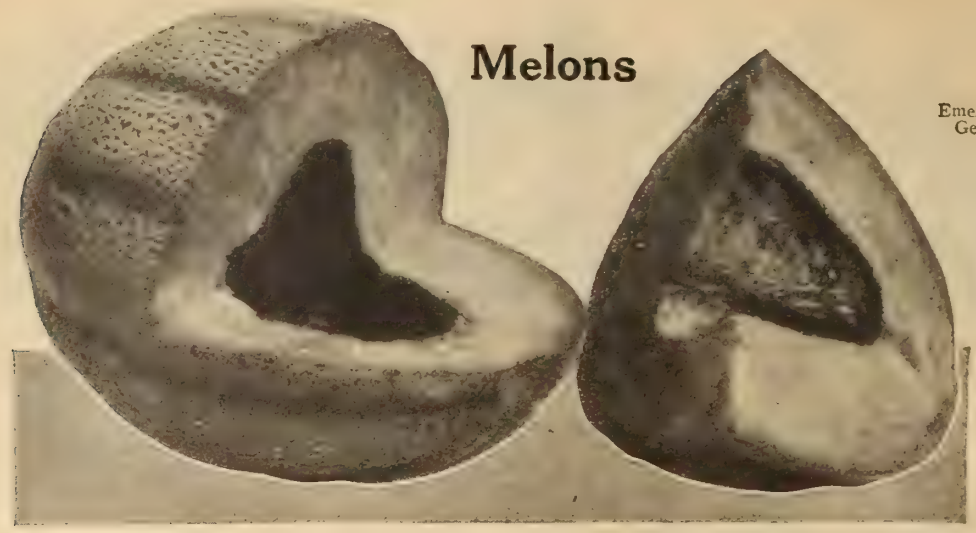
Melons



Emerald Gem

One reason we particularly recommend melons for the home garden is because they are practically the only vegetable of a long, long list that can be classed with fruit. Any person can raise melons and they will grow almost anywhere. Even if only a small spot is available a few hills should be planted, especially Childs' Paradise.

Plant ten seeds in each hill, covering half inch. Hills 4 to 6 feet for Muskmelons and 8 to 10 feet apart for Watermelons. Thin out to four or five plants later. Work fertilizer and sand into each hill. When plants appear, sprinkle with soot or bug death. One ounce will sow about 50 hills.

Muskmelons

Pumpkin

Vegetables have many and varied uses, but it remains for the Pumpkin, alphabetically speaking, to be the first to signal its usefulness for pies. Thanksgiving Day has nationalized it. Plant in the corn field, along fences, or in some corner where the vines can climb and ramble at will. A general practice, and a good one, is to drop 3 to 5 seeds in every third hill in the corn patch. Where the Pumpkins are grown as a garden crop, the same general requirements as given for melons and directions for growing them will be found practical.

Everlasting Pumpkins Grown by Dr. Downing, Littleton, N. H.

1650 Everlasting. The best keeper of the Pumpkin family. We have known the same identical Pumpkin to take prizes at Fairs two years in succession. Rather flat, immense in size. Creamy color. Color of flesh is bright deep orange and very thick, as the seed cavity is small. It is fine-grained, cooks easily and is of most delicious flavor. Strong, vigorous grower and exceptionally productive. **Pkt. 25c. Postpaid.** (Almost a crop failure.)

The photo inclosed shows the Everlasting Pumpkins I had on one single plant. Had 5 on one runner. I had just as good success with your Hubbard Squash.—A. T. Downing, Littleton, N. H.

Royal King Pepper is large, early, sweet and a great yielder

Pepper

If you have a heart that burns for a fine garden and a soul that yearns for delicious vegetables, we say include peppers. It is a pleasure to grow them. It is a housewife's delight to serve them.

Pepper plants require a long season to develop and bear a crop. Seeds are generally sown early indoors in boxes. As soon as the seedlings make the second or third pair of leaves, transplant in other boxes at least 3 inches each way. Do not set out into the garden until you prepare your cucumber hills or the tomato patch.

1580 Large Early Neapolitan. Unquestionably one of the earliest and most prolific of all Sweet Peppers. The fruits are ready within 120 days after seeds are sown, averaging 4 inches long by 2 inches in diameter and single plants frequently carry from 40 to 50 fruits at one time. Bright red, sweet, fine and tender. **Pkt. 10c; ½ oz. 20c; oz. 35c; ¼ lb. $1.15; 1 lb. $3.75. Postpaid.**

1620 Golden Giant. (See color illustration on page 51.) Never was a vegetable introduced that found such instant demand as this yellow pepper. It seemed as if the ladies were waiting for just such a thing. Similar to Chinese Giant in almost every way except the color. A trifle sweeter and more tasteful than the red varieties. **Pkt. 10c; oz. 60c; ¼ lb. $1.75. Postpaid.**

1590 Royal King. (See illustration.) An improved strain of Ruby King, but is vastly superior. Twice as thick-meated and much milder. It is very sweet and free from pungency. Unusually prolific. Excellent shipper. **Pkt. 10c; ½ oz. 20c; oz. 35c; ¼ lb. $1.20. Postpaid.**

1600 Chinese Giant. The largest fruited of all. The plants are most vigorous and thickly set, with the blocky, almost square fruits averaging 4 to 5 inches in diameter both ways. The greatest favorite of all for stuffing and salads because of its size and mild flavor. Glossy scarlet when ripe, used as much in the green as ripened stage. Flesh is very thick and mild. **Pkt. 10c; ½ oz. 35c; oz. 65c; ¼ lb. $1.95. Postpaid.**

Six plants of Crimson Giant will furnish enough Rhubarb for the entire family

Rhubarb

1800 Crimson Giant. (See illustration.) We have in the course of many years discovered two outstanding essentials in Rhubarb, viz:—flavor and stringiness. All other attributes, all other varieties, all else, in fact, count as nothing. For this reason we center our activities upon the Giant Crimson, knowing it is the best, the most reasonable, the hardiest, the sweetest, the tenderest, the most stringless and the most dependable. It seems to thrive under positive neglect. Shoots up quickly in the spring. It is the sweetest, most pleasing flavored rhubarb ever grown (and we have tried them all). It tastes similar to Raspberry and Strawberry combined. When cooked, its high color is especially attractive. The skin is thin, the flesh firm, brittle and tender. Color is bright crimson, except the young newly started shoots. Try this and you will discard all others. **Pkt. 10c; oz. 15c; ¼ lb. 35c; 1 lb. 95c. Postpaid.**

Spinach

Spinach is accredited with being the vegetable that contains most body-building essentials. Spinach is fed to the ailing, to the strong, the rich and the poor. Some families eat it twice a day. Every one should have it 3 to 7 times a week. The body requires it. The best thing in the world for the busy working man. Sow in 18-inch rows, thin out to 5 inches apart. New Zealand should be sown in 3 to 5 foot rows, 18 inches apart in the row.

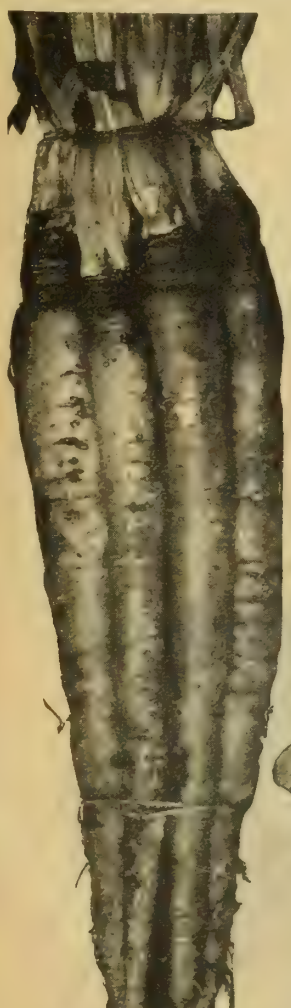
1810 King of Denmark. It has the ability to withstand the scorching sun without running to seed and still be fresh, tender and green. Grows in compact form, round, thick, dark green crumpled leaves. **Pkt. 10c; oz. 15c; ¼ lb. 20c; 1 lb. 55c.**

1830 Norfolk Savoy Leaved. Preferred by many for Fall planting since it endures extremely cold weather in good shape. **Pkt. 10c; oz. 15c; ¼ lb. 25c; 1 lb. 45c. Postpaid.**

1820 Long Season. (See illustration.) Derives its name from its ability to resist heat for prolonged periods, without going to seed or getting uneatable. It is very tender and sweet. Can be enjoyed continuously throughout the season. Leaves are a rich dark green, very thick, crumpled and finest quality. **Pkt. 10c; oz. 15c; ¼ lb. 25c; 1 lb. 45c. Postpaid.**

1840 New Zealand. A rather spreading plant, making an extremely vigorous and rapid growth after passing the seedling stage. Well developed plants will cover a space 5 feet wide in all directions. The tender tips of the branches and the leaves furnish fine greens. The greatest perpetual bearing Spinach for Mid-Summer. **Pkt. 10c; oz. 15c; ¼ lb. 30c; 1 lb. 85c. Postpaid.**

1835 Winter Prickly. Hardiest variety. Vigorous. Productive. Pointed leaves. Slow flowering. **Pkt. 10c; oz. 15c; ¼ lb. 25c; 1 lb. 45c.**



The fried patties of grated Oyster Plant will make you forget that Oysters are out of season.

Salsify or Oyster Plant

Grow in the manner suggested for Parsnips. Thin out to 4 inches apart in the row when large enough to handle. They are boiled and creamed or grated and made into patties which, fried, possess oyster-like flavor, hence the title "Oyster Plant."

1850 Sandwich Island Mammoth. (See illustration.) Produces thick, smooth, brown roots with pure white flesh. The standard everywhere. Has very pronounced oyster flavor. Is an extremely delicious variety. It is large, vigorous growing, with long, smooth, tapering roots. Matures in 140 days. Roots of this variety may be left in the ground all winter, as freezing will not hurt them. Stores well in the cellar. **Pkt. 10c; ½ oz. 15c; oz. 20c; ¼ lb. 65c; 1 lb. $1.95. Postpaid.**

Childs' Earliest of All

Radish

This radish is the King of Relishes. It can be kept in season from May until the following spring, viz.: Very early in April sow seeds of the early globe-shaped, olive-shaped and long kinds. Sow short rows every week, and be sure to thin out the seedlings 1 to 2 inches apart for small kinds, 4 to 6 inches apart for the later, larger-growing varieties. After middle of May, sow the Cincinnati Market, which will stand August heat. Early in July, sow White Strasburg and Round Black Spanish. White Strasburg, ready for use in September, keeps well throughout October. Round Black Spanish matures later and is a fine keeper.

1675 Childs' Leafless or Overnite. (See illustration on page 22 and further description on page 23.) Radishes to be good must grow rapidly. Therefore the quicker the growth, invariably the more crisp and tender. So it is with this superb, extremely early radish of unusual rapid maturing habit—it is very, very crisp, tender, cool and sweet.

Many radishes grow to tops; not so with this superb variety as it has no tops to grow to, seldom having more than two or three leaves, hence its name Leafless. We believe this is by far the best variety for the home garden (the amateur), as it is the one radish of radishes that will produce a radish, if not planted too thick to prevent it.

It almost seems to come up "Overnite," hence again its name—for the rule seems to be an edible radish within two weeks. It is of round globe shape. Very pleasing to the eye. Planted a few at a time several days apart, a continuous supply of radishes are always available. **Pkt. 15c; oz. 25c; ¼ lb. 65c; 1 lb. $1.75. Postpaid.**

Your Overnite Radish is a wonder, such small leaves and fine bulbs. —C. R. Carroll, (Market Grower), Amherst, Mass.

Your Leafless Radish is unusually fine.—E. F. Donner, Moorhead, Minn.

Your Overnite Radish produced much earlier than any other radish I had planted.—O. T. Coleman, County Extension Agent, Palmyra, Mo.

I had wonderful success with your Leafless Radish.—Geo. L. Young, Orient, N. Y.

You have a great radish in your Overnite variety.—R. A. Nogal, (Market Grower), Conneaut, Ohio.

Your leafless radish is very fine. Shows up nice when bunched for market.—Sutherland Bros. (Market Growers), Morrisonville, N. Y.

1680 Earliest of All. (Similiar in appearance to illustration of Childs' Leafless.) Next to lettuce the first fruits of the garden are radishes, and this is an early radish to grow. Although bred for both extreme earliness and quality, it is a very attractive, bright crimson radish. Matures in about two weeks' time and is much used for forcing; bulbs form quickly and fairly uniform with small tops. It presents a striking appearance, shape round. Flesh pearly white, cool, crisp, tender, sweet and toothsome. **Pkt. 10c; oz. 15c; ¼ lb. 35c; 1 lb. $1.00. Postpaid.**

1700 Improved Crisp Sparkler. Claimed by many to be handsomest of all radishes. The scarlet-red is especially bright. The white covers almost the lower half of the radish. It is very crisp, solid and sweet. Matures in 25 days and retains its crispness longer than most other varieties. **Pkt. 10c; oz. 15c; ¼ lb. 30c; 1 lb. 85c. Postpaid.**

1720 Improved French Breakfast. A long olive-shaped variety of deep scarlet color with the lower one-third white. Maturing in about 25 days. It has small tops. Flesh is pure white, exceedingly crisp, tender and sweet. A very dependable variety. **Pkt. 10c; oz. 15c; ¼ lb. 30c; 1 lb. 85c. Postpaid.**

1690 Scarlet Turnip White Tip. (See illustration in color on page 51.) The more critical you are of your radish, the more emphatic your appreciation of this variety. It is a highly bred variety that produces the most attractive glowing scarlet white-tipped radish grown. The flesh is white, solid, crisp, juicy, piquant, pleasing flavor. Begins to form its bulbs as the tops appear. It is conceded one of the most attractive of the radish family. The tops are noticeably small; small tops mean fine radishes. Matures in about 22 days. This variety is unquestionably the most generally grown for both home and market purposes, as it has every requisite of a perfect radish such as earliness, appearance, quality and dependability. The amateur would do well to use it. **Pkt. 10c; oz. 20c; ¼ lb. 40c; 1 lb. 95c. Postpaid.**

1725 Earliest Forcing. One of the earliest strains of all the "little round" radishes and particularly suited for extra early radishes in the home garden. Bright scarlet turnip radish, very smooth and round, with small tops, allowing it to be grown closely together in hot-bed or forcing bench. Fine also for out-of-doors. **Pkt. 10c; oz. 15c; ¼ lb. 30c; 1 lb. 95c. Postpaid.**

Earliest Forcing.

Radish

1730 White Box. This variety has always been very popular on account of its retaining its tenderness and crispness for weeks after it is even overgrown, which is a very desirable attribute in a radish. It is a full globe shape, slightly flattened. Skin is a pure white, thin and attractive. It is a very tender, crisp, sweet, cool and refreshing variety. **Pkt. 10c; oz. 15c; ¼ lb. 35c; 1 lb. 95c. Postpaid.**

1703 Early Scarlet Turnip. A fine quick-growing early Radish of good quality. **Pkt. 10c; oz. 15c; ¼ lb. 35c; 1 lb. 95c.**

1717 20-Days Express. Is fit for the table in twenty days. Full grown in twenty-five days. Color, brightest, richest scarlet, tipped with white. Quality very mild. **Pkt. 10c; oz. 15c; ¼ lb. 35c; 1 lb. 95c.**

1705 Crimson Giant. Roots grow up to 2 inches in diameter without getting pithy or losing their fine flavor. Skin bright crimson, flesh white as snow. **Pkt. 10c; oz. 15c; ¼ lb. 35c; 1 lb. 95c.**

1713 Giant Butter. The largest of the early round sorts, small tops, and vivid scarlet color. Flesh crisp, high flavored and tender. **Pkt. 10c; oz. 15c; ¼ lb. 35c; 1 lb. 95c.**

1715 Early Mammoth. Known also as "Chartier." Most important variety for midsummer use, since it remains in tender, brittle condition when all other early kinds become pithy. Tender, and mild in flavor. Its color is deep pink and white. **Pkt. 10c; oz. 20c; ¼ lb. 45c; 1 lb. $1.00.**

1750 White Icicle. (See illustration.) The most popular and, we think, the best long white radish in the world. It is as dependable as it is popular. Ready for use in three weeks. Can be used when small. Of crisp, tender, mild flavor. The leaves are short, few in number, and permit of close planting. Roots attain a length of 4 to 6 inches and about ¾ of an inch thick. It retains its fine table condition longer than any other radish, long, short or round. No better variety could be secured for the home garden. **Pkt. 10c; oz. 15c; ¼ lb. 30c; 1 lb. 85c. Postpaid.**

1740 Cincinnati Market. Unquestionably the best strain of the long red radishes. Roots 6 to 7 inches long are matured in about 35 days. Rosy scarlet color, with a pure white tip. Short top. Flesh white, tender, crisp, and finest flavor. **Pkt. 10c; oz. 15c; ¼ lb. 30c; 1 lb. 85c. Postpaid.**

1760 White Strasburg. The roots are carrot-shaped and have a very much thicker skin than those of preceding varieties. Later than Icicle, and generally considered the best for midsummer and early fall. The flesh is crisp, solid, tender, and quite mild while the roots are young. They are at their best averaging 5 inches long by 2½ to 3 inches in diameter at the top. **Pkt. 10c; oz. 15c; ¼ lb. 35c; 1 lb. 95c. Postpaid.**

Squash

1910 Cocozelle Bush. Of the entire squash family we consider this vastly superior and by far the best and finest flavored of them all, with the added advantage of being able to use it at any stage of its growth. See fuller description on following page. **Pkt. 10c; oz. 20c; ¼ lb. 40c; 1 lb. $1.25. Postpaid.**

Your Cocozelle Squash is the finest of any variety we ever had. I think every one of your leading vegetables are all you claim for them, and I guess I've tried them all but your 60-day Cauliflower.—Mrs. Chas. Berry, Greenpoint, N. Y.

Since we have been using your Cocozelle we have given up all other varieties, as our family won't eat any other except during the winter, and we use your Improved Hubbard as it is an enormous yielder.—H. P. Williams, Youngstown, Ohio.

Golden Summer Crookneck and Early White Bush

Squash

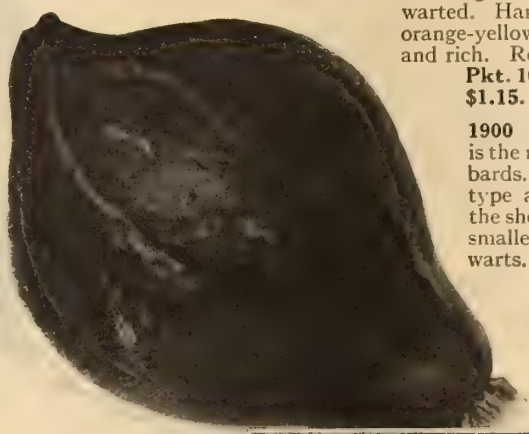
For the amount spent for one squasn from your grocery man you could buy the seed to grow squash enough to keep a family of six for a year. The summer varieties make the most tempting, tasteful, appetizing dishes imaginable, especially Cocozelle Bush. The winter varieties, also exceptionally delicious, can be kept throughout the winter with the greatest of ease. Sow in hills 6 to 8 feet apart usually any time after May 15th. Sow bush varieties in rows 3 feet apart and 18 inches apart in the rows.

1860 Early White Bush. (See illustration.) This improved bush squash is vastly superior to the old deeply scalloped type in the amount of flesh they contain and the supremely good flavor. The white bush always has had a very good reputation for yield. It matures in about 70 days, which is very early for the squashes. Average about 12 inches in size. Very fine grained. Sweet and delicious. Of true bush habit. Clear white color. Fruits flat and inclined to scallop. **Pkt. 10c; oz. 15c; ¼ lb. 35c; 1 lb. $1.00. Postpaid.**

1890 True Improved Hubbard. (See two illustrations below.) This is the old hard-shelled variety that was about all our grandmothers would bank on, much improved and most of the warts eliminated. So it stands today unquestionably the best known, best liked of the entire squash family. It is by far the best for winter storage. It differs in flavor from the summer varieties and is a truly delicious winter dish. It is a good home and market variety. It is of vigorous, hardy, trailing growth. Rich dark bronze-green in color. Moderately warted. Hard shell. The flesh is bright orange-yellow, fine grained, thick, dry and rich. Requires 120 days to mature. **Pkt. 10c; oz. 15c; ¼ lb. 40c; 1 lb. $1.15. Postpaid.**

1900 Golden Hubbard. This is the most productive of the Hubbards. It is the same shape and type as the True Hubbard, but the shell is orange-red color, a trifle smaller in size and contains more warts. Matures in about 105 days. Flesh is deep gold, much richer looking than the green variety. Very fine flavored. A good keeper. **Pkt. 10c; oz. 15c; ¼ lb. 35c; 1 lb. $1.15. Postpaid.**

1910 Cocozelle Bush. See preceding page (page 45) for illustration. Long Island gardeners are making large sums growing and selling this variety. One gardener near Hempstead, N. Y., says he has customers come 30 miles just to get this variety because it can be used in all stages. Highly prized because it contains unusual quantities of the valuable element called Vitamines. Doctors prescribe Summer Squash for children to make them sturdy. A 15-foot row of this in our trial grounds yielded about 50 fruits. Wherever there are children in the family, this squash should be grown. Compact bush growth with dark green foliage, oblong shape, 12 inches or more long, 4 or 5 inches in diameter. Skin dark green with still darker green stripe. **Pkt. 10c; oz. 20c; ¼ lb. 40c; 1 lb. $1.25. Postpaid.**



Improved Hubbard

1915 Delicious. This is unquestionably one of the finest of the Hubbard types. The skin is almost free from warts. The flesh is exceptionally fine grained, sweet and it is unquestionably the most delicious squash of this class. It grows of medium size or to about 8 to 10 lbs. Is an excellent keeper. Will keep until late spring. Matures in about 100 days. It gets its name from its fine sweet flavor. **Pkt 10c; oz. 20c; ¼ lb. 50c; 1 lb. $1.25. Postpaid.**

1870 Giant Summer Crookneck. (See illustration above.) It would be hard to over-rate the merits of this squash. It is so extremely delicious that it is hard to eat in moderation. It is a treat that always carries a hankering for more. Matures in about 70 days. Although they are delicious when fully matured, they are vastly more so if used before they fully mature. Skin is a beautiful deep orange. The flesh is a rich salmon-orange. **Pkt. 10c; oz. 15c; ¼ lb. 35c; 1 lb. $1.00. Postpaid.**

1917 Squash Seed Mixed. All varieties mixed for the small garden. **Pkt. 15c; oz. 20c; ¼ lb. 30c; 1 lb. 95c. Postpaid.**

Here's concrete evidence of the quality of your Long Island Improved Hubbard Squash seed.—A. T. Downing, M. D., Littleton, N. H.

Turnip

Although turnip comes about last alphabetically, it ranks as one of the first in vitamines, the great life builder. The varieties below have a mild, delicious flavor. Eat plenty of them and keep well. Sow as early as possible in spring.

For fall and winter use sow Purple Top White Globe and American Purple Top Rutabagas any time in July. Sow thinly in rows 18 inches apart, and thin out turnips to 8 inches in the row, and rutabagas 14 to 18 inches. One ounce sows a 100-foot row. One pound sows one acre in drills.

2090 Japanese Mammoth. One of our old-timers. Introduced years ago by us. Still the best turnip for table use. Unquestionably the largest. Frequently reaches 15 lbs. in size. Very few orders for vegetable seeds reach us without this superb turnip being ordered. It is a sound variety. Pure white color. Very solid and very sweet. Best for the late summer. A fine keeper and unexcelled for stock feeding. Seldom fails to take first prize at exhibitions. **Pkt. 15c; oz. 25c; ¼ lb. 75c; 1 lb. $1.95.**

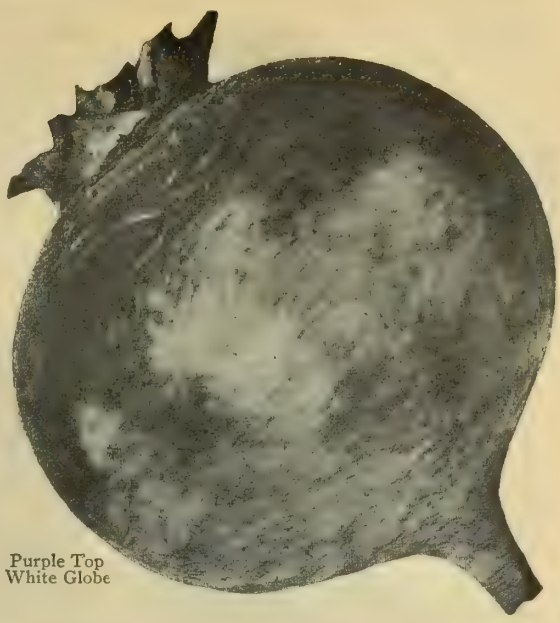
2100 Early White Milan. This is an extremely quick maturing turnip of a clear white ivory color and perfectly smooth white skin. It develops so rapidly that even the skin is tender and the whole turnip can be eaten like an apple. The flavor is pleasingly mild. The flesh is tender, crisp, cool and sweet. Ready for use in 40 days. **Pkt. 10c; oz. 15c; ¼ lb. 35c; 1 lb. 95c. Postpaid.**

2120 White Egg. In many ways is the best for the small garden, especially for the beginner. It matures early and is adapted to both spring and fall sowing. Egg-shaped, about one-third longer than it is broad. Has a very smooth skin. Matures in about 70 days. Flesh is white, tender and sweet. **Pkt. 10c; oz. 15c; ¼ lb. 25c; 1 lb. 65c. Postpaid.**

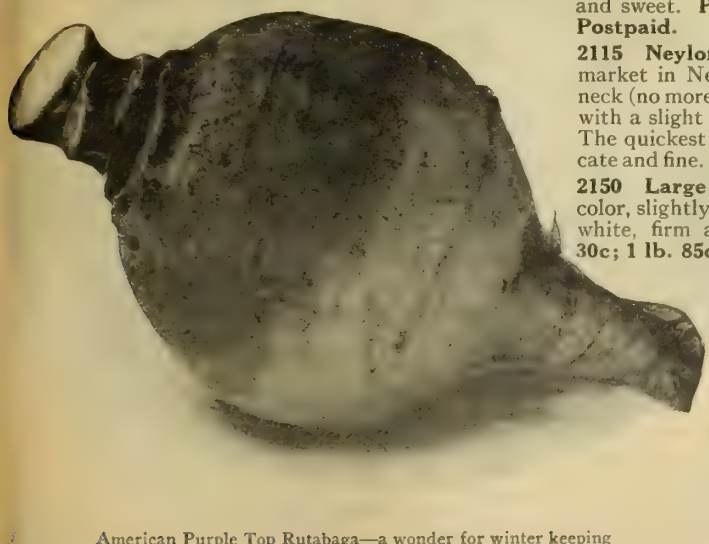
2105 White Quality. This turnip is delicately flavored, exceedingly crisp and tender and white in color. Size medium. This turnip holds unsurpassed tenderness and crispness. **Pkt. 10c; oz. 20c; ¼ lb. 50c; 1 lb. $1.50.**

2110 Purple Top White Globe. (See illustration.) This is the most popular of the turnips. It is very attractive, almost perfect ball-shape, ideal size, heavy yielder, and excellent keeper. It is large, upper portion purple, lower part white. Tenderest in the stages before fully matured. Fine stock feed. The flesh is white, tender, fine grained and mild in flavor. 50 days. **Pkt. 10c; oz. 15c; ¼ lb. 20c; 1 lb. 65c. Postpaid.**

2130 Yellow or Amber Globe. A good variety to sow at the same time as the earlies. The skin is smooth and yellow. The flesh is light yellow, fine grained, firm and sweet. Large size and is excellent for both table and stock feeding. An excellent sort for milk cows. **Pkt. 10c; oz. 15c; ¼ lb. 25c; 1 lb. 75c. Postpaid.**



Purple Top White Globe



American Purple Top Rutabaga—a wonder for winter keeping

Rutabaga or Swede Turnips

Swede Turnips, or as we know them best—Rutabagas—are now more generally used for table use than any of the turnips. As a ration for stock feeding turnips are now a recognized essential. Economy on the dairy farm cannot be accomplished without generous feedings of Turnips, Mangels and Carrots. Cattle, horses, hogs, sheep and poultry do best, require less grain and hay, when fed root crops. Try them this year.

2140 American Purple Top. (See illustration). In recent years this variety has supplanted the Turnip in many gardens and on many farms because many prefer the Rutabaga (yellow turnip) for table use to the regular Turnips, also because it will keep to perfection all winter until late the following spring. One of the best Rutabagas for table or stock feeding. It is the sweetest; the largest; the best looking; the biggest cropper; the easiest to harvest; the best keeper; the most even in size; ripens most uniformly. The flesh is fine grained, golden-yellow, mild flavored, solid and sweet. **Pkt. 10c; oz. 15c; ¼ lb. 25c; 1 lb. 65c. Postpaid.**

2115 Neylon Neckless. Popular with growers who market in New York City. It is a Turnip without a neck (no more neck than a Parsnip). Color amber-yellow with a slight purple top. Large and uniform in size. The quickest growing Rutabaga we know. Flavor delicate and fine. **Pkt. 10c; oz. 20c; ¼ lb. 50c; 1 lb. $1.50.**

2150 Large White Rock. The roots of pure white color, slightly shaded green at the top. The flesh is white, firm and sweet. **Pkt. 10c; oz. 15c; ¼ lb. 30c; 1 lb. 85c. Postpaid.**

From the Guelph, Ontario, "Daily Herald": "Father Swift ripened a few White Tomatoes in the rectory garden of the Church of Our Lady. Seed saved from those few specimens produced the fine plants which have been noticed in these columns. The variety is known as Childs' Snowball and was originated by John Lewis Childs, of Floral Park, New York. While residing in New York City, Father Swift had the pleasure of inspecting the Childs' Nursery, greenhouses and trial grounds."

I had great success with Beefsteak Tomatoes. Some of them weighed 2 pounds and were twenty inches in circumference. But the greatest surprise was in slicing them to find no hard, unripe center, as is the case with very large Tomatoes.—J. B. Waddell, Lonoke, Ark.

115 WAYS TO USE TOMATOES

Tomato

Tomatoes are especially rich in vitamines.

Great crops of fine fruits may be grown even in limited space. Sow seeds early in April indoors. When seedlings are 2 to 3 inches tall, transplant them 2 to 3 inches apart in other boxes. Harden gradually by freely exposing them to the air, and by May 15th set them into the garden in well prepared spots, 2½ to 3 feet apart each way.

Great crops of red or purple fruits may be grown by either raising several varieties bearing in succession, or by the same kind, by repeated sowings. The best practice is to provide plants of different varieties maturing in succession.

Purple Skin Varieties

1920 June Pink. One of the earliest of all, fruits in about 100 days. It is quite solid, of distinctly mild flavor. It has only a short season of bearing, however, so home gardeners should not grow this sort exclusively, but it surely should be in every home garden. **Pkt. 10c; ½ oz. 30c; oz. 55c; ¼ lb. $1.40; 1 lb. $4.75. Postpaid.**

1930 Globe. This finest of all purple varieties may well be termed the acme of perfection. Of symmetrical globe-shape, with delicious deep red flesh, an ideal home garden and market garden variety. Were we confined to one variety, it would be Globe. It has no superior in solidity, contains few seeds, and for canning we consider it the equal of any scarlet variety. Fruits within 110 days. **Pkt. 15c; ½ oz. 30c; oz. 50c; ¼ lb. $1.50; lb. $4.50. Postpaid.**

1950 Ponderosa. The largest tomato grown and unsurpassed in thick flesh, lusciousness, freedom of seeds and superb flavor. Deep purple. Oblong, ribbed. A great family garden sort for big crops. **Pkt. 15c; ½ oz. 30c; oz. 55c; ¼ lb. $1.65; 1 lb. $5.00. Postpaid.**

1940 Trucker's Favorite. Flattened shape but deep. Solid, finest quality. **Pkt. 10c; ½ oz. 25c; oz. 40c; ¼ lb. $1.25; 1 lb. $3.75. Postpaid.**

Five New Tomatoes

1975 Childs' Earliest Producer. (See illustration above.) Somehow or other we all watch and wait for early tomatoes. Here is an extra early tomato that will require less waiting than any. It matures in 95 days. Especially in the Northern districts is it valuable, as it is a quick maturing type.

The fruits are of fine size, brilliant scarlet color. Ripens uniformly. Nearly round. Entirely smooth. Flesh solid. Finest flavor. Very productive. Tough skin. Good keeper. Fine shipper. **Pkt. 15c; ½ oz. 40c; oz. 75c; ¼ lb. $2.00; 1 lb. $6.00. Postpaid.**

1977 Diener. Reach the enormous weight of three pounds, average fruit about one pound. The flesh is more solid than any variety known. It is a magnificent dark red shade which makes it very attractive. It is very sweet and free from acid. The yield is enormous, absolutely blight resisting. It is medium late in ripening, but carries its enormous load of fruit until fall. **Pkt. 20c; ½ oz. 35c; oz. 65c; ¼ lb. $1.90; 1 lb. $5.75.**

Diener, photo reduced to one third of actual size

1985 Beefsteak, or Two-Pound (Buckbee). The popular conception of a perfect Tomato is a large, solid, meaty fruit that will cut into thick ruby slices. This new sort is probably the largest of all Tomatoes; crimson color. **Pkt. 15c; ½ oz. 35c; oz. 65c; ¼ lb. $1.90; 1 lb. $5.75.**

2015 Snowball (Buckbee). A Tomato so white that it shows only a faint tinge of straw color. Most beautiful fruit, large, smooth, very solid and finest quality. **Pkt. 15c; ½ oz. 40c; oz. 75c; ¼ lb. $2.15; 1 lb. $6.50.**

2010 Golden Jubilee. A yellow tomato of immense size. Single specimens frequently reach 2 lbs. in weight. The fruits are round and solid. Contains but few seeds. The flesh meaty, extremely sweet and mild in flavor. It is unusually pretty. Its eating quality is superior to the red and purple sorts on account of its exceptional sweetness. 125 days. **Pkt. 15c; ½ oz. 30c; oz. 55c; ¼ lb. $1.65; 1 lb. $5.00. Postpaid.**

Marglobe the Best Salad Variety

Tomato

For canning, these are greatly preferred because of their richer, deeper red color. All scarlet sorts are of greater acidity than the purples.

2025 Marglobe. (See illustration.) An extremely heavy yielding red tomato, introduced by the U. S. Dept. of Agriculture as of unusual and outstanding merit, on account of its ability to resist rust and wilt. Matures in about 95 days. Ripens evenly. Does not crack. Very meaty. Large, smooth, globular. **Price, Pkt. 15c; oz. 55c; ¼ lb. $1.40; 1 lb. $4.75. Postpaid.**

1960 Bonny Best. Bonny Best is ready for picking from 100 to 105 days after seeds are sown. Where staked, with the plants reduced to the three strongest branches, it is very difficult indeed to beat Bonny Best in yield. Fruits average 3 inches in diameter, are slightly flattened, and borne in handsome clusters. Very heavy crop producer. **Pkt. 10c; ½ oz. 25c; oz. 35c; ¼ lb. $1.15; 1 lb. $3.75. Postpaid.**

1970 Matchless. The greatest scarlet main crop sort in cultivation. Bears magnificent 8 to 10 oz. fruits. Few seed cells break up the solid crimson flesh, which is also of delightful quality. Matures in about 120 days. A great home garden variety. **Pkt. 10c; ½ oz. 25c; oz. 40c; ¼ lb. $1.25; 1 lb. $3.75.**

1980 Dwarf Stone. Grows distinctly upright with close, stocky joints, so that well-developed specimens do not average over 3 feet high. For best results, the individual plants should be supported with a stake, however. The fruits average about 3 inches in diameter. Plants may be set 2 feet apart each way. Matures in about 130 days. If undecided which variety to grow, try this one. **Pkt. 10c; ½ oz. 30c; oz. 40c; ¼ lb. $1.35; 1 lb. $3.95. Postpaid.**

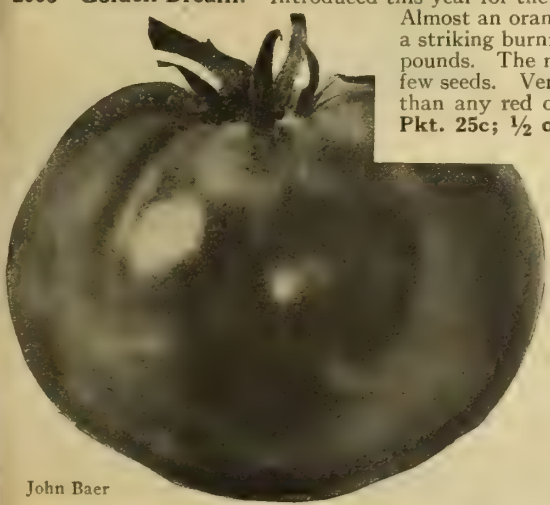
1990 Select Stone. Considered one of the leading general purpose and main crop tomatoes. The fruit is very large, deep, bright, scarlet, smooth, exceedingly solid, firm flesh, and of superb flavor. Fruits ripen evenly, even to the stem end. Has no superior for slicing, home canning and commercial canning, tomato soup, catsup, etc. This is the variety generally used for select basket trade. The safer type for the beginner. Matures in about 130 days. **Pkt. 10c; ½ oz. 25c; oz. 40c; ¼ lb. $1.00; 1 lb. $3.00. Postpaid.**

2000 John Baer. (See illustration below.) Valued for its small seed cavity and freedom from seeds (which also account for the high price of the seed.) It is one of the best flavored; in fact the quality is wonderful. One of the heaviest yielding. Size is larger, flesh solid and luscious. Matures in about 125 days. **Pkt. 10c; ½ oz. 25c; oz. 45c; ¼ lb. $1.25; 1 lb. $3.75. Postpaid.**

Yellow Varieties

2010 Golden Jubilee. (See opposite page.) **Pkt. 15c; ½ oz. 30c; oz. 55c; ¼ lb. $1.65; 1 lb. $5.00. Postpaid.**

2006 Golden Dream. Introduced this year for the first time. The most striking color in a yellow yet offered. Almost an orange-yellow, not that homely yellow so usual in a tomato, but a striking burnished-orange. Average one pound, some run as high as two pounds. The meat is almost solid, with flesh a rich golden-yellow. Very few seeds. Very prolific. No acid. Very delightful flavor, much more so than any red or purple tomato; in fact it has a flavor decidedly its own. **Pkt. 25c; ½ oz. 50c; oz. $1.10; ¼ lb. $3.00. Postpaid.**



John Baer

Small-Fruited Varieties

2020 Yellow Plum. Plum-shaped yellow color, sweet, solid. Fine for preserves.

2030 Scarlet Plum. Rich bright red plum-shaped tomatoes of exceptional sweetness. One of the best for canning, pickling and preserving.

2040 Yellow Pear. This is a pear-shaped yellow variety of noticeable sweetness. None better for preserves. An excellent yielder. Good long keeper.

2050 Red Pear. A very sweet, solid, fine quality preserving variety. Productive. Red color. Pear-shaped.

2055 Husk Tomato. This is the ground cherry used so extensively for preserves. Grows low on the ground. The fruit is formed within a shell or husk.

Six Sterling Childs' Vegetable Specials

See Color Illustrations Opposite

Pepper—In presenting the vegetables below, on the opposite page, and pages 21, 22, 23 and 24, we desire to state that we have avoided all extravagant claims. The descriptions as set forth, while they may appear glowing to you, are really in fact underestimated and modest. You will find upon trying them that Mrs. Wright of our own city, who wrote about the Rajah Beet, will be expressing your opinions about any of these wonderful vegetables. Also, in practically every variety they are distinct types, far different than can be purchased elsewhere.

Pepper—Childs' Golden Giant

Golden and yellow peppers have become so exceedingly popular of late that we show this superb variety in color on the opposite page so you can see exactly how it looks. In size it averages about four inches. To those who have a vegetable garden we beg of you to allot a small space for this free-growing, free-fruiting variety. It affords a relief from the monotony of forever using the green and red peppers.

We believe it is of more pleasing flavor and less pungency than the green peppers. Do not hesitate to follow our advice and give it a trial, we know you will thank us for insisting that you do try it out. Really it's a pepper—par-excellent—one we are proud of and one you will be equally pleased with.

1620 Pkt. 10c; ½ oz. 35c; oz. 60c; ¼ lb. $1.75. Postpaid.

Lettuce—Childs' Matchless

This is another introduction of our own that we are mighty proud of. It is something decidedly different from any other lettuce and far more meritorious. In fact it is unequalled.

It is a hybrid which forms a long loose head which for tenderness and brittleness is truly marvelous. It is so crisp, so brittle that it snaps or breaks like celery or glass, hence not recommended as a shipper but unquestionably the home garden variety of all varieties. No other lettuce has a flavor like it or superior to it.

No better variety is known for general home growing or table use. It has a peculiar formation of growth that resembles a cross until it starts heading. If you want the finest, best flavored, crispest lettuce possible to be had—then use this. If it isn't all we claim for it we will refund your money.

1150 Pkt. 15c; oz. 30c; ¼ lb. 85c; 1 lb. $2.50. Postpaid.

Beet—Rajah

This really wonderful winter beet has become more popular from year to year, since we first offered it, and is in a class by itself for winter use. Whoever wishes to enjoy the delicious flavor and tenderness of June beets all winter has only to grow this sort and store it in a cellar for winter's use. It will keep perfectly until new beets are ready again in the spring. You will find it tender and delicious as a June beet up to May the following spring. Early beets are considered of little value for winter's use, as they become tough and flavorless, but with the Rajah you have a beet that is suitable for summer, the best for fall and winter. It is exceedingly smooth, almost heart-shaped and under good cultivation will grow to 4½ lbs. Color blackish blood-red. Foliage light green. Distinct from all other beets.

400 Pkt. 15c; oz. 25c; ¼ lb. 65c; 1 lb. $1.95. Postpaid.

Your claims are small. Why, the half has not been told about your Rajah Beet. We have grown it three years. It is more luscious, more tender than any beet we ever had. It takes less time to cook it. Last year some weighed five pounds. This year we had one that weighed 5½ pounds. Best of all, I keep them in the cellar all winter until April and they are as tender as when just pulled.—Mrs. Carney Wright, 25708 Lawrence Ave., Floral Park, N. Y.

Radish—Scarlet Turnip, White Tipped

Here's a radish so thoroughly rouged and improved that it is our candid opinion that no other radish excels it in any way except our "Leafless Overnite" and that only in freedom of foliage and extreme earliness. However, it has very small tops. As for color, appearance and attractiveness it speaks for itself (see opposite page). It is exceedingly striking. One of the finest for general table use, equally valuable for market purposes.

The flesh is a glistening white, cool, very crisp, tender and of the finest flavor. Very piquant and juicy—noticeably so. We particularly recommend this for the novice, for the home garden and for general all-around purposes.

The skin is a bright pinkish scarlet with distinct white tip. We believe it the most popular radish in America, deservedly so—as it has all the requisites that are or could be desired in a radish. Our seed is of a select strain, grown from selected transplanted roots. We invite comparison and suggest sowing alongside of other strains of the same variety so that you can know first-hand that our claims of superiority are founded on fact. Hence our reason for illustrating in color.

1690 Pkt. 10c; oz. 20c; ¼ lb. 40c; 1 lb. 95c. Postpaid.

Corn—60-Day or Makegood

Unquestionably the earliest of all Sweet Corns. Full 10 days earlier than Golden Bantam, and just as sweet. Truck gardeners in and around New York reap big profits from our "60-Day" because it's the first on the market. Many gardeners make more on our "60-Day Corn" than they do the rest of their crops. We mention these facts so you will know how extremely early and sweet it is. It is rich and juicy. Just as sweet as the famous White Cory. It has a more desirable shape than any sweet corn.

It is pearly white in color, plump, fat, luscious kernels that fairly melt. Stalks grow about 3 feet high, usually bearing two ears each. They do not sucker. As compared to the plant itself the ears are enormous. We have never introduced a vegetable that we have had more pride in.

760 Pkt. 15c; ½ lb. 30c; 1 lb. 50c; 2 lbs. 90c. Postpaid. 5 lbs. $2.00; 10 lbs. $3.75; 25 lbs. $7.00. Not postpaid.

Corn—Childs' Golden 60-Day

Same as above in every way except it is of golden color and the ear a trifle more pointed. An occasional cob may show an odd white kernel.

765 Pkt. 15c; ½ lb. 30c; 1 lb. 50c; 2 lbs. 95c. Postpaid. 5 lbs. $2.00; 10 lbs. $3.50; 25 lbs. $7.50. Not postpaid.

I have tried your 60-day Makegood Corn and will say it is at least 10 days earlier than Bantam.—H. M. Pearl, Good Hill Farm, Grand Isle, Vt.

Your 60-Day Sweet is certainly a fine variety.—Geo. D. Bartlett, West Springfield, Mass.

Your 60-Day Sweet Corn is a wonderfully early and sweet variety.—Randolph Griffin, Market Grower, Courtland, Va.

Your Sweet Corn, Carrot, Radish and Peas are the best I have ever grown.—R. Golwenda, Market Grower, Grand Rapids, Mich.

Permit me to say your 60-Day Sweet Corn is a marvel. Altho we had three frosts in June it came in ahead of all others and was surely a financial stroke of luck for me.—C. R. Carroll, Market Grower, Amherst, Mass.

Why You Should Buy Your Flower Seeds From a Flower Seed House

Three very essential things enter into your purchase of Flower Seeds, viz.—Experience, Ability, Quality.

EXPERIENCE—54 years ago Mr. Childs started this business because he was a Horticulturalist and Naturalist by sheer love of the beautiful outdoors. He had grown up in this atmosphere. He became one of the leading Authorities in America on everything and anything pertaining to flowers, plants, bulbs, shrubs, etc.

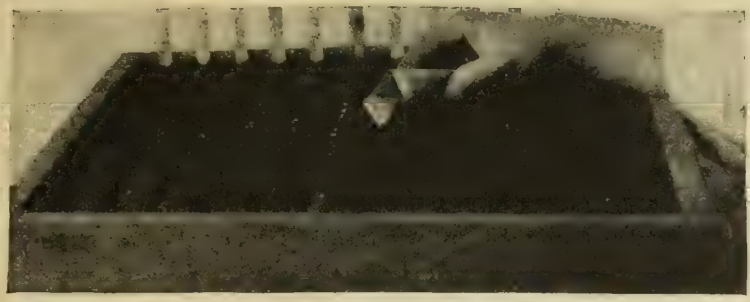
Childs' name became a synonym to Horticulture. We developed and introduced hundreds of things, many of which are commonly known to you today. Many seedsmen today are but dealers—having little or no experience in actual growing or developing.

ABILITY—We are so sure, so positive of our own creations and of all others we grow, we know exactly what you may expect, what you will receive, hence one of the very few growers who guarantee everything we sell by refunding or replacing to the value of the purchase price.

QUALITY—We make a practice of soil-growing tests before we send out our products, not like many who give them field tests the summer following the harvest or after the seeds have been shipped to their customers.

How To Start Seeds In The House

Box 3 to 4 Inches Deep, Any Width, Any Length.



Plant Seed Almost on Top the Soil, Never Deeper than 3 Times the Thickness of the Seed.

Usually enough plants for an ordinary garden can be secured from a one-row planting, as shown above, with a stake at the end of row with the name of the variety, or write the name vertically on the outside of the box. After the seed is sown, keep fairly moist, place in a warm location where they will receive plenty of bright light. As soon as large enough to take hold of, transplant to other similar boxes about 1½ inches apart in the row. Later transplant again to pots or to the open ground if warm enough outdoors.

TWO RULES TO SUCCESS. Sow flower seeds just below the surface, never deeper than three times their depth. Pinch off the tops of the young plants to make them branch out bushy and bloom freely.

Annuals. These head the list for general use on account of their habit of blooming and reaching their full growth in the same season as sown. According to class they are used in every conceivable location.

Perennials. We recommend the sowing of Perennial seed in the spring. Perennials are valued for their habit of growing and blooming year after year without resowing. They produce the earliest blooming and are usually the last in flower before freeze-up. (See Color Illustrations of Perennials on Page 103.)

The "Surprise" is the great variety of fine things and will be entirely of our own selection.

Aster Alpinus *(Perennial Type)*

All the Asters heretofore described are annuals—half-tender. This Old World sort is perfectly hardy, and though neither the plants nor the flowers are as large as in the other types, the abundance and bright pleasing color of the blue-petaled, yellow-centered blooms (also in shades of blue and white) makes them useful in borders and rockeries, and for cutting.

50880 Aster Alpinus, mixed. Pkt. 15c; ¼ oz. 50c.

Ageratum

Because of its beautiful shades of blue, its free flowering habit, and its easy culture, one of the most used and appreciated garden annuals. Start under glass for early blooms; in the open ground for late summer flowers; and in August for winter blossoms in the house. It blooms steadily as long as flowers are cut before they go to seed.

READ WHAT OTHERS SAY OF SENSATION PETUNIA

After you have tried all the others, Sensation remains the one and only Petunia.—Mrs. H. C. Carmichael, Rahway, N. J.

Sometimes when I read your descriptions I wonder if you believe all you write. After growing Sensation Petunia and your Giant Zinnias I feel you are too modest, for they exceed your wildest claims. — Mrs. J. C. Morriay, Bradford, Pa.

Petunias

Tender perennials (treated as annuals in the North) unsurpassed for massing in beds. Good for window boxes too, and excellent winter house plants whether raised from pot-sown seed or lifted from garden, cut back and potted just before cold weather. While young, plants want warmth, sunlight and plenty of moisture; outdoors allow 12 to 18 inches between them. Their rich coloring, lovely forms and texture, duration of bloom, easy culture and drought-resisting qualities insure their popularity. Flood the garden with flowers from early spring till late fall.

54700 Sensation. A true Elks Pride. (See page 19 for description.) This is the richest purple for window boxes or the garden, sown alone or with others. Looks like a piece of velvet. We Urge You to Read This

No matter where you live, whether it be North, East, South or West, we offer you something in Perennials that we consider infinitely better than can be purchased elsewhere.

To better illustrate our point, we call your attention to Frost-Proof Cabbage Plants now so hardened off in the growing, that Cabbage Plants once so tender that on cold spring nights they had to be covered, will now resist frost to 20 degree above zero. Cabbage plants are made hardy to such a degree simply by growing on the Ocean areas where the salt sediment can settle upon them. No special seed, no other method whatsoever is used.

Childs' Perennials are grown almost under the same identical conditions except that we are located so that the ocean breezes, mists, fogs and winds sweep across us on three sides.

Our Perennials are noted far and wide for their superior vigor, profusion of bloom and hardiness. We assure you of long-living types, once planted always there—and at unusually attractive prices—when you consider you have no delivery charges to pay.

Helpful Suggestions Selecting Perennials

Many persons write us for help in laying out their Perennial Gardens, all of which we are pleased to answer.

However, laying out a Perennial garden is extremely simple if you just remember to place the tall-growing sorts in the background and taper to the front with the lower or dwarfer sorts. Planting each type in clusters or groups together is advisable.

Also bear in mind it is a most difficult thing to advise on varieties—this you almost must do for yourself—as our likes may be your dislikes, our dislikes may be your preferences, therefore we offer below a table of Tall, Dwarf and Cutting Varieties.

Childs' Greatest of All Specialties

Big Field Grown "Own-Root" Roses

Everblooming Crimson Ramblers

See Color Page on Rear Cover

Vastly superior to anything we have ever offered before. Just the thing for the Amateur and Novice. No suckers to grow up and produce inferior wild roses. No need to worry about the rose "running-out" and becoming a poor type.

Our Big Roots—Two-year-old Field Grown Roses are a sensation. As big as most three-year-olds, and will win your admiration on sight. If not superior to any rose bush bought elsewhere—you may return at our expense. Gorgeous Bloom the first year. Large healthy flowers that will make you swell with pride.

Read This Before Buying Roses Anywhere

We are one of the very few seedsmen who sell Roses grown on their **"Own Roots."** We do not sell Budded or Grafted Rose Bushes. Our reason is this: Fully ninety per cent. of grafted or budded roses throw out suckers from the roots, which in time predominate the plant, and all you get is either a non-flowering bush, or a lot of wild-flower looking roses. Most bench-grown roses should never be used at any price as they are invariably florists' discarded bushes that have outgrown their blooming usefulness. This does not occur with own-root roses.

In our opinion it would pay you to pay $5.00 for an own-root rose, rather than grow budded or grafted stock. Cost but a few cents more than the widely advertised bench-grown varieties of grafted bushes.

Childs' Exquisite Gladiolus

The most beautiful specimens in the world were created right here—by Childs. We are the original introducers of the Large Flowering type of Gladioli, now the leading varieties of the world. They are tall and erect, standing four and five feet high, with spikes of bloom over two feet in length and frequently five to seven inches across. Our bulbs are large top size that produce enormous flowers the first year.

The Two Wonderful Newest Glads

5598 Joerg's White. (See illustration.) Unquestionably the largest flowered of all Gladiolus. No other white has the luster and sheen. No other white seems so white as this one. Most white varieties appear like "pigmies" alongside of this. Measures 5½ inches across and nearly 20 inches in length. Flower stems average 36 inches. Two, often three stems, to the bulb. Won highest awards from American Gladiolus Society, also New York Horticultural Society. **Each 75c; doz. $7.50. Postpaid.**

5467 Childs' Arlene. A new Gladiolus just out. Beautiful to behold. Fascinating to an extreme. Most exquisite color combination. The ground is a uniform pink shading in the throat to a pale flesh-pink with deep crimson base. The lower petals are marked on inner two-thirds with a bright, velvety, crimson-scarlet zone, which extends all the way across the petal in a semi-circle form, and runs down into the throat. **Each 75c; doz. $7.50.**

Joerg's White

Large Flowering Gladiolus.

The large flowering Gladioli grown and sold everywhere all over the world were introduced by us. The botanical name is Childsi (named after us). (See any Botanical Encyclopedia.) Does it not follow that the clearest, newest, finest strains should be best from the original source of supply? As real new meritorious types are produced we catalog them, but never, no never, do we introduce a new variety unless it is distinct enough to be of unusual merit. We are the real Gladiolus Pioneers. Plant any time from April to July in any fairly good soil, well spaded. Set in rows six inches apart, or in masses four inches apart each way.

New White Gladiolus

5802 Tiffany. We offer for the first time this year this fine ruffled, new glistening white. We believe this is the only real pure white to be had. The blooms on the New York City florist market were sold as fast as offered, thus showing it is destined to become a big commercial variety. Heretofore it has been impossible to secure a pure white, as all whites have had some markings of some color.

The flowers also retain their freshness for exceptionally long periods, thus making it very popular for cut flowers, table decorations, weddings, etc. Anything good commercially is always the best for the home garden, as it is an indication the people prefer it. Here is a Gladiolus of the Primulinus type that should be in every garden for perfect contrasts. Won the Award of Merit, Mass. Hort. Society; First Prize, American Gladiolus Society; First Prize, N. Y. Hort. Society; First Prize at Boston; First Prize at Hartford, Conn.; First prize, Nassau, N. Y., Fair. **Each 20c; doz. $2.00; 100 for $12.00. Postpaid.**

Childs' Garden, House and Pot Plants

A view of growing greenhouse plants in bloom

Although we classify the few following pages as House Plants, it is only because of their peculiar fitness as pot plants for indoor purposes, and because they cannot be left outdoors over winter (except Hydrangeas). However, nearly everything listed as such are equally suitable for growing outdoors during the summer months.

While many of them are known as tender plants, it does not follow that such plants are puny and weak; in fact it is just the opposite, for almost without exception the growth is vigorous and the bloom comes in profusion.

We have already elsewhere throughout this catalog emphasized the vigor and hardiness of Long Island grown plants and shrubs.

Humus for Lawns

Positively the finest Humus in America, bar none. Clean, odorless and free from weed seeds. Nothing equals Humus as a top dressing for lawns or to improve the soil where grass does not grow well. It is splendid to sweeten the soil in shady places and under shrubbery. Scatter it thickly over the lawn in fall or spring. In places where grass does not do well and on bare spots in the lawn, loosen the top soil and work in plenty of Humus before sowing the grass seed. Mixed with the soil for house plants, will increase the growth of the plant and the size of the blossoms. Nothing better for holding moisture and fertilizer in the lawn. Humus is clean decayed vegetable matter ripened and cured by the elements (odorless). Prices F. O. B.
